

Date	Speaker	Title	Lab	Institute
2/24/2011	Attila Gulyas-Kovacs Craig Pace	Inferring functional side chain interactions in proteins from evolutionary dependencies Development of an Exceptionally Broad and Potent Bispecific Anti-HIV Antibody	Gadsby Ho	Rockefeller Rockefeller
3/31/2011	Andreas Keller Brian Zeglis	Genetics of Smelling Click Chemistry as a Modular Strategy for the Construction of Radiometallated Antibodies for Positron Emission Tomography	Vosshall MSKCC	Rockefeller MSKCC
4/28/2011	John LaCava Ayesha Joshi	New Tools for Protein - Protein Interactions: Native Elution, High- Throughput Biochemistry, and Cross-linking Interaction between Pten and estrogen signaling pathways in Endometrial Carcinoma	Rout Ellenson	Rockefeller Cornell
5/26/2011	Margarita Arango-Lievano Francesca Zammarchi	Use of Viral Strategies for the Study of P11 Function in Depression and the Antidepressant Response Modulation of STAT3 alternative splicing as a tool to dissect its anti-tumorigenic potential.	Kaplitt Cartegni	Cornell MSKCC
6/30/2011	Nermi Parrow Teodoro Pulvirenti	The regulation of hepcidin in b-thalassemia Wnt signaling promotes self-renewal and sustains tumorigenicity in human gliomas	Rivella Hall	Cornell MSKCC
